Regression Discontinuity Designs

3. In your own words, what is the main assumption behind a regression discontinuity design? *

4. Imagine that I have an intervention that was assigned based on a continuous score (from 1 to a 100, and the cutoff for receiving the treatment was $c=50$). Can I use a regression discontinuity design to estimate the effect for units with a score of 25 vs units with a score of 75? Why or why not? *

Feedback and questions

This section is optional. Please answer truthfully to help improve your experience!

5. About the class videos that have been posted...

Mark only one oval.

- ☐ I've watched all of them
- ☐ I've watched some
- ☐ I haven't gotten around to watching them yet
- ☐ I'd rather not respond

6. Did you find the last lecture...

Mark only one oval.

- ☐ Too fast-paced
- ☐ Pace was ok
- ☐ Too slow-paced

7. Do you find the live R coding useful in class?

Mark only one oval.

	1	2	3	4	5	
Not useful at all	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Very useful

8. Do you have any questions related to the material we covered in the previous classes or any other comments or suggestions you would like to make?
